

Features & Benefits

- Completely removes static
- Eliminates partial tip loads and failed pickups
- Each lot of freefall is tested on the automation platform it was designed for

Introducing FreeFall

Freefall is the next innovation in automation tips consisting of flexible polypropylene across the top of the tips holding them together as a single unit. Tested over 100 continuous cycles across several different liquid handlers including Beckman, Agilent and Molecular Devices the freefall shows error free pickup, aspiration, delivery and ejection with every rack.

Coming Soon for the following:

Automated Liquid Handler	
Agilent®	V11 VPrep
	V11 Bravo
Beckman®	Biomek FX/NX 384 head
	Multimek
	AP384
	Biomek 3000
Molecular Devices®	FLIPR Liberty
